

ENVIRONMENTAL POLICY

At 17 ASUS Resources Ltd., we are committed to creating structures that not only stand the test of time but also harmonize with the environment. Our dedication to sustainability drives us to integrate the latest design technologies and materials that reflect our future-centric approach.

Commitment to Sustainability

We recognize the significance of employing modern and sustainable materials throughout our construction processes. Our projects are a testament to innovative construction techniques and sustainable practices, aiming for a minimal environmental impact and a zero carbon footprint.

Innovative Practices

We are proud to have pioneered several iconic projects that set new benchmarks in sustainable construction. By continually pursuing best practices in sustainability, we ensure that each project reflects our dedication to reducing our environmental footprint.

Sustainable Building Approach

The field of sustainable and renewable construction is evolving rapidly, and we are at the forefront of these changes. Our commitment to sustainability is reflected in every project we undertake, supported by rigorous application of our Environmental Management Systems (EMS). We continuously innovate and strive to improve our environmental performance.

Responsible Sourcing and Supply Chain Management

We take responsibility for the materials we use and ensure that they are sourced ethically and sustainably. Our supply chain is audited regularly to maintain compliance with our environmental systems and procedures. We also ensure that our suppliers meet the highest standards of sustainability and environmental stewardship.

Environmental Impact Reduction

Our investment in sustainable suppliers and materials selection enables us to meet performance specifications while minimizing our environmental impact. We are dedicated to reducing our carbon footprint and enhancing the environmental performance of our projects.

Ongoing Commitment

We continuously review and update our environmental practices to align with evolving standards and regulations. Our goal is to lead by example in environmental responsibility, ensuring that our operations contribute positively to the environment and society.

Conclusion

At 17 ASUS Resources Ltd., our commitment to sustainability is integral to our mission. By prioritizing environmental responsibility and innovation, we aim to create enduring structures that benefit both our clients and the planet.
